Guoliang Yang Memorial Mini-Symposium

Behrakis Grand Hall, Drexel University, 3210, Chestnut St., Philadelphia, PA 19104

Friday, February 1, 2013, 1:00 PM

www.drexel.edu/physics/news/calendar/Yang/

Contact: Jian-Min Yuan
yuanjm@drexel.edu

Speakers

Carlos Bustamante, UC Berkeley

How the ribosome modulates nascent protein folding

Bruno Samori, University of Bologna

Observing the osmophobic effect in action on protein folding at the single molecule level.

Steven B. Smith, Albuquerque

Understanding the overstretch transition in dsDNA. One mechanism is not enough

Sanford Leuba, University of Pittsburgh

The interaction of PcrA DNA helicase with RecA filaments on DNA, one-at-a-time

Jian-Min Yuan, Drexel University

Effects of macromolecular crowding on protein stability and aggregation
