From Data to Action

Mock MMRC Workshop

Birth Justice Philly / Phila Dept of Public Health

Trainees will gain an understanding of maternal morbidity and mortality data, the structure and function of Maternal Mortality Review Committees (MMRCs), and how data-driven recommendations are developed and implemented. The workshop includes an interactive mock MMRC meeting where participants analyze a complex case through a social determinants of health lens, develop recommendations, and discuss how these can be translated into actionable policies and programs to advance maternal health equity.

Sarah Weinbrom, MPH
Maternal Mortality & Morbidity Epidemiologist

Mara Pliskin, M. Ed
