Creativity & Innovation Colloquium

An interactive talk on the birth of great ideas

Wednesday, March 5, 2014

4:00 PM - 5:15 PM

NEW **Gerri C. LeBow Hall**

Grand Meeting Room, 2nd Floor, Room 220
3220 Market Street
Philadelphia, PA 19104

Reception to follow in the Rose Terrace

Join us for the second program of the series as our guest speakers share their journeys in research and their views on the importance of interdisciplinary research in fostering global initiatives, creativity, and collaboration.

"To Enrich Life – An Engineer's Journey"

Dr. Klaus-Jürgen Bathe

Professor, Mechanical Engineering
Massachusetts Institute of Technology

Dr. Bathe specializes in computational mechanics. He has made fundamental contributions in the finite element analysis of structures. The pioneering methods developed by Dr. Bathe and his students are extensively used throughout the world in commercial and academic computer programs.

"Following One's Passion Even When The Destination Isn't Clear"

Dr. Frank J. Lee

Associate Professor, Game Design
Antoinette Westphal College of Media Arts, Drexel University

Dr. Lee co-founded Drexel's Game Design Program in 2008 which is consistently ranked as one of the Top 10 Best Undergraduate and Graduate Game Design Programs in U.S. and Canada by The Princeton Review. He is also the founding director of the Entrepreneurial Game Studio @ The Excite Center at Drexel University.

Moderated by **Dr. Antonios Kontsos**
Assistant Professor, Mechanical Engineering & Mechanics
Drexel University
