Upcoming Event:

Information Session:
Fall/Winter Co-op

Pizza and soda will be provided

Date: April 27th 5pm – 6pm

Location: 3201 Arch Street

JP Morgan offers CO-OP's in Software Development and Infrastructure Engineering. During your 6 month CO-OP you will gain valuable experience working alongside our highly talented IT professionals in support of our business and our customers. You'll be invited to attend a senior speaker series and other exclusive events to meet colleagues and senior leaders to develop your professional network. Through the 6 month CO-OP program you'll have a mentor to support and advise you. CO-OP's who successfully achieve their objective will have an opportunity to receive offers to join J.P. Morgan Chase for a second CO-OP or as a full time employee into our TAP program upon graduation. Visit **http://techcareers.jpmorgan.com /techcareers/us/opportunities** to find out more.

The Technology Analyst Program (TAP) is a global entry-level program designed to create talent pipelines in technology in EMEA, APAC and the US. TAP is focused on attracting, recruiting, developing and retaining top technology talent for the firm.

The Technology Analyst Program places recent university graduates as full time analysts directly into the lines of business as application developers, business analysts, infrastructure engineers, and systems engineers. While in the two year program, analysts build technical and leadership skills through challenging assignments, comprehensive feedback and coaching, rigorous training and performance management. Initiatives include TAP Boot Camp, an intense six week interactive learning experience, immediately upon joining the firm; the CIO Speaker Series; group coaching on performance management and other career topics; a mentorship program with Expert Engineer program alumni; Force For Good, group projects in which analysts can apply their skills to a non-profit's technology challenge; and an ongoing training curriculum focused on professional and technology skills.

JP Morgan offers other events that students can take advantage of such as Code for Good, where you collaborate with other coders to develop innovative technology solutions for non-profits. These events take place across the globe and provide opportunities to meet senior JP Morgan Technologist. To keep you up-to-date by email with relevant information about future career opportunities, recruiting events and latest news visit; http://careers.jpmorgan.com/careers/programs/code-for-good
