Design a Data Analysis App Contest

FlowJo, LLC, the world's leading software for cytometric data analysis, is sponsoring a contest to build a Java plugin application for the FlowJo® software in conjunction with the DragonHacks 2017: **http://dragonhacks.io**

FlowJo is used across the world to study cellular data in settings like the pharmaceutical industry, universities, and hospitals. The software features an open API, which anyone can write plugin applications for and share through the FlowJo Exchange: **http://exchange.flowjo.com/**

Write your own plugin that contributes an algorithm to the FlowJo community and win the **$2,500 grand prize**!

Entries must be submitted by April 2nd at 2:15 PM

John Quinn, PhD from FlowJo, LLC will hold a kick-off seminar describing flow cytometry, how FlowJo is used, and demo some existing plugins.

Friday, March 24th in Bossone 709 @12 PM NOON

A plugin developer's guide is available at: https://www.gitbook.com/book/flowjollc/flowjo-plugin-developers-guide/details

Example plugins are available on the FlowJo Exchange: http://exchange.flowjo.com and demo flow cytometry data is available online: https://s3-us-west-2.amazonaws.com/fjinstallers/Tutorials/8_Color_PBMC_Tutorial.zip or on request

An additional cash prize will be awarded for every 10 functional submissions

Submit entries or write questions to john@flowjo.com

Fine Print: Eligible submissions must include documentation in Gitbooks following format of the developer's guide. The author gives FlowJo, LLC the right to distribute submitted plugins without further compensation.
