The Program for Public Health Ethics & History

When the world becomes *too real*: A new explanation of autistic perception

Tuesday, April 9, 2013
3:00 PM — 4:30 PM

Friends Center
1501 Cherry Street
3rd Floor -
Martin Luther King Room

Dr. Pellicano's current research aims to understand the way that people with autism perceive and interpret the world around them and how any such differences impact people's everyday lives. She is also committed to improving relationships between people with autism and (non-autistic) scientists and to enhancing the public understanding of autism; both the challenges and opportunities.
