Understanding Challenging Behavior in the Classroom

Free Workshop for Teachers at Drexel University Washington DC Center

While the priority in any classroom is the instruction of academic content, teachers are often expected to manage classroom behaviors. This presentation will describe why challenging behavior occurs both in regular and special education settings from preschool through high school. In addition, participants will learn skills and strategies to reduce challenging behaviors while encouraging appropriate classroom behavior.

Participants will:

1. learn the major components and circumstances surrounding challenging
2. behavior acquire skills to effectively prevent the majority of challenging behaviors in the classroom
3. develop procedures that can be used to stop a problem behavior when it occurs
