A.J. Drexel

Autism Institute

Laura Graham Holmes received her Ph.D. in clinical psychology from the University of Utah and completed her clinical internship at CHOP as a fellow in the Leadership Education in Neurodevelopmental Disabilities program. She is currently a postdoctoral fellow at CHOP's Center for Autism Research. Dr. Holmes' research has focused on understanding sexuality development and romantic relationships for adolescents and adults on the autism spectrum within the contexts of family, healthcare systems, and culture.

Children's Hospital of Philadelphia

**Sex and Love on the Autism
Spectrum**

Monday, December 18th, 2017

1:00 PM – 2:00 PM

**A.J. Drexel Autism Institute
3020 Market St.
Suite 501
Idea Lab**

How do adults on the spectrum navigate the complexities of sexual and romantic relationships? If desired, what do people need to achieve fulfilling relationships, and how does difficulty in this domain affect health and well-being? Dr. Holmes will discuss current trends in research on sexuality and relationships for individuals on the autism spectrum and her ongoing research with men and women on the spectrum and their families.
