Learn About Emerging Research on Cannabis and Driving with Tom Marcotte, PhD.

Sponsored by Drexel University's Medical Cannabis Research Center

Dr. Thomas Marcotte is Professor of Psychiatry at the University of California, San Diego, and Co-Director of the Center for Medicinal Cannabis Research, which has conducted cannabis clinical trials for almost 25 years. He is the principal investigator on studies addressing the effects that cannabis on driving ability, has collaborated with law enforcement on studies (laboratory; on-road) regarding officer detection of cannabis-related impairment, and served on state-wide impaired driving task forces as well as national panels (e.g., Transportation Research Board). He has participated in symposia and presented work regarding traffic safety to, among others, law enforcement, forensic toxicologist, judicial, and traffic safety advocacy groups. He has served on a number of journal editorial boards, and is lead editor of the book Neuropsychology of Everyday Functioning.

Dr. Marcotte will be presenting on his research into the impact of cannabis consumption on driving performance, the ability of law enforcement to detect impairment, and public health messaging to reduce cannabis-impaired driving.
