SYSTEMS ENGINEERING & ENGINEERING MANAGEMENT

Interested in pursuing an education in Systems Engineering in Infrastructure?

The need for rebuilding our nation's infrastructure to meet present and future needs is critical. Today's infrastructure projects require a blend of engineering disciplines to coordinate the cyber, physical, economic, social and environmental systems. Managing those projects requires a specific skill set using systems thinking approaches and methodologies to understand the dynamic interactions between project components combined with effective techniques to combat inherent risk.

The Systems Engineering at Drexel University has received an award from the U.S. Department of Education's GAANN program. Your fellowship will enable to you to learn, experience and disseminate your findings in this exciting area. The benefits include:

- Free tuition
- An annual stipend of up to $34,000
- Experiential learning opportunities
- Reduced teaching assignments
- Mentoring by faculty and staff

Research opportunities are available at major U.S. entities as well as in-house research. **Deadline to apply is July 1, 2020**. But early applications are encouraged and will improve your chances of acceptance.

Eligibility is limited to U.S. citizens and permanent residents. Women and minorities are encouraged to apply.

Contact the department for more information: ccm49@drexel.edu
