"Women in Statistics: We've Come so Far?"

Department of Epidemiology and Biostatistics Seminar Series

Leslie Ain McClure, PhD, MS
Professor, Chair
Epidemiology and Biostatistics
Dornsife School of Public Health

The term leaky pipeline has been used to describe the disappearance of women from STEM fields, and the field of statistics is no exception. In this talk, I will describe the leaky pipeline in statistics and biostatistics, discuss some of the reasons why women leave STEM fields, and discuss strategies for helping to plug the leaky pipeline.

December 9, 2020
2:30 – 3:30 pm EST
Via Zoom
