YOU'RE INVITED TO AN UPCOMING WEBINAR!

You Want How Much for My District's Data?

Important Steps to Protect Your District and Student Data from Hackers

THURSDAY, MARCH 18, 2021 | 3:00 P.M. – 4:30 P.M. ET

According to the U.S. Government Accountability Office (September 2020), thousands of K-12 students were affected by reported data breaches. "The FBI and the Cybersecurity and Infrastructure Security Agency (CISA) recently warned that ransomware attacks on K-12 entities had risen dramatically during the 2nd half of 2020 and that these and other cyberattacks are likely to continue over the next year," *Ropek, 2021.*

This webinar will focus on steps every public and private school should implement to protect their data from hackers. Professors Carroll, Heverin, Pirmann, and Popyack will focus on the technical aspects of protecting your data, while Professors Gould and Kozak will draw on their 25+ years as school superintendents to speak to the importance of the practical and legal considerations for protecting your students and district's liability against data breaches.

PRESENTED BY:

Professors Chris Carroll, Thomas Heverin, Tammy Pirmann, Jeffrey Popyack
Drexel College of Computing & Informatics

Professors John Gould and Michael Kozak
Drexel School Leadership Council
