YOU'RE INVITED TO AN UPCOMING WEBINAR!

Creating a Sustainable Future:

How to Lead, Work, and Learn in the Industry 4.0 Environment

Wednesday, April 6, 2022
3:00 pm ET

REGISTER TODAY
Online.Drexel.Edu/Sustainable-Future

Organizational leaders have been facing challenges as they navigate the complexities and disruptions caused by the pandemic, political polarization, economic uncertainty, and globalization. In this webinar, the impact of digital trends, tools, and technologies that ushered in the 4th Industrial Revolution will be examined through the lens of leaders, learning organizations, and work environments. The role that colleges and universities will need to play to alleviate the skills gap in the digital age, and the collaborative partnerships required to prepare the workforce in this dynamic environment is beginning to emerge.

Please join the faculty at Drexel University's School of Education who will share their insights and ideas related to creating innovative spaces within existing K-12 learning organizations, transforming higher educational systems, leading digital transformations in the context of the Future of Work, and developing intercultural and global competencies as key enablers of individual and organizational success.
