Drexel Engineering Faculty Development Series 2022-2023

KEEN 101

Free Teaching Resources for Faculty!

What is KEEN and as a FACULTY member, how can I benefit from it?

Join Dean Walker for a brown bag lunch workshop about free teaching resources!

The Kern Entrepreneurial Engineering Network (KEEN), a program of the Kern Family Foundation, empowers the rising generation of Americans to build flourishing lives anchored in strong character, inspired by quality education, driven by an entrepreneurial mindset, and guided by the desire to create value for others.

Dr. Jennie Atchison (MEM) and Johanna Casale (ELS) will introduce you to the Kern Family Foundation's engineering education website Engineering Unleashed.com, where you can find lesson plans and other resources to help you build your courses or add content to support active learning to existing courses.

We will explore how to inspire curiosity, facilitate making connections, and ultimately create value through the Engineering Mindset.

Students participating in a Value Sensitive Design activity from KEEN as part of Freshman Design

November 29, 2022

11:30 a.m. – 12:30 p.m.

Hill Conference Room, LeBow 240

and Zoom
