22/23 NUMBER 3

THE FARAJOLLAH & MARYAM BADIE ARFAA LECTURE SERIES

DREXEL ARCHITECTURE DESIGN&URBANISM

LECTURES

Drexel University's
Mandell Theater
33rd & Chestnut Streets

THUR 6PM **4.13.23**

Eric Höweler, FAIA

UNDER THE WEATHER

Unlike weather, climate is, by definition, a statistical phenomenon, a set of records, data points, and averages collected over long periods of time. Architecture exists in both weather and climate. It is an immediate response to phenomena, rain, wind, and snow—shielding and sheltering from the elements. But it can also create spaces for making those forces more visible. This lecture will explore **Höweler + Yoon's** remarkable designs for ecological education and environmental immersion. Designs such as ***FloatLab***, planned for the Schuylkill River at Bartram's Garden, use architecture to promote research, eco-literacy, and environmental remediation. Eric Höweler will also be leading this year's Charrette sponsored by the Department of Architecture, Design & Urbanism.

Free and open to the public
Worth 2 AIA ces credits
