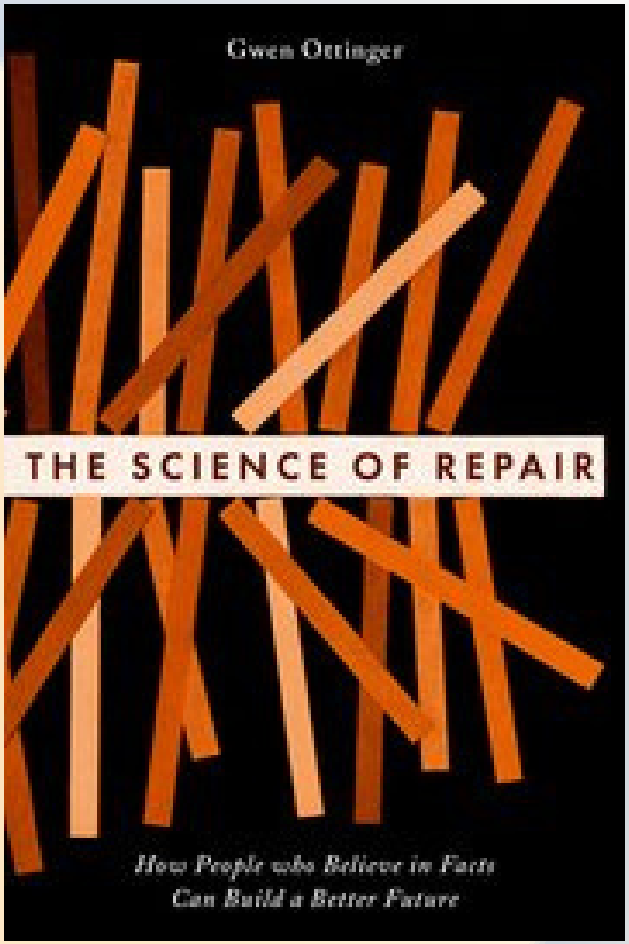
The Science of Repair:
How People who Believe in Facts Can Build a Better Future

DREXEL UNIVERSITY
Center for
Science, Technology and Society
College of Arts and Sciences

Tuesday April 28th

2:00-3:30pm

PISB 104



Gwen Ottinger
Professor
Drexel University

Emily York
Associate Professor
James Madison University

Join Drexel's Center for Science, Technology, and Society and Emily York for a discussion of Gwen Ottinger's new book.

A transformative account of the role science can play in combatting injustice, *The Science of Repair* chronicles people deploying research to deepen solidarity, accountability, and hope, and offers guidance for conducting reparative science.

"*The Science of Repair* is not just a timely defense of a justice-attuned research enterprise, but also an important contribution to the age-old efforts to square knowledge and action. Read this book and you may think and act differently." --David Guston, Arizona State University
