Multidisciplinary Perspectives on Careers in Maternal and Child Health: An Evening with Professionals to Explore

Maternal and Child Health (MCH) is one of the broadest disciplines in health-related fields. MCH careers span all areas of public health including community health & prevention, epidemiology/biostatistics, health management & policy, and environmental & occupational health. While demands on the MCH workforce are great, the number of MCH professionals is declining. There is national emphasis on increased training for current professionals and students preparing to enter the field.

At this event, students interested in MCH will have the opportunity to

- meet various multidisciplinary professionals working in MCH;
- learn about MCH research opportunities, career options, and career paths; and
- discuss with professionals and SPH alumni how to best prepare for a career in MCH.

Hosted by the Maternal & Child Health Working Group

U.S. Department of Health and Human Services
HRSA
Health Resources and Services Administration
