Discovering the World Through GIS at Drexel University

Join us to learn how Drexel researchers are using Geographic Information Systems (GIS) to investigate challenges in today's world. The event will include presentations from:

- Dornsife School of Public Health Urban Health Collaborative: studying the relationship between neighborhoods and health
- College of Nursing and Health Professions: advancing knowledge to promote optimal health for Philadelphia mothers, children and families
- Academy of Natural Sciences: Delaware River Watershed Initiative
- College of Arts and Sciences Biology Department: Modeling the distributions of primates in West Central Africa
- College of Computing and Informatics: Center for Spatial Analytics and Geocomputation

The event is free and open to the public. Please RSVP, because space is limited, to Steven Melly sjm389@drexel.edu
